Hokkaido University Graduate School of Medicine
Application Guidelines for
August Examination, 2023 and
January Examination, 2024 for
Master's Program
in Medical Science
(For enrollment April 2024)

Hokkaido University Graduate School of Medicine

Outline of Master's Program in Medical Science

1. Educational Philosophies, Educational Goals, Expectations of students, Basic Policy for Entrant Selection

Under the basic philosophies of Hokkaido University, “Frontier Spirit”, “Global Perspectives”, “All-round Education” and “Practical Learning” and the educational philosophies of the Graduate School of Medicine “to lead the world with cutting-edge research in medical science” and “to equip the next generation of medical researchers and medical professionals with a strong sense of ethics and a well-rounded character to contribute to the health and welfare of humanity”, the Graduate School of Medicine sets its educational goal to nurture individuals who possess high ethical standards, highly specialized knowledge, and research and teaching capabilities regarding medicine, life science and social medicine (public health), as well as individuals who possess the deep insight to meet the diverse, wide range of health and safety requirements from local and international community. The Graduate School of Medicine expects “① students who are willing to be engaged in research tailored to clarify life phenomena, to overcome diseases, and to improve human health standards” and “② students who have intellectual curiosity, show the ability to analyze things logically, persevere as a team, and aspire to work as international leaders in each medical field.” and “③ Students who have fundamental reading comprehension in foreign language (English) and writing skills before enrollment ”

Selection shall be determined based on the comprehensive evaluation of entrance examinations, academic transcripts, and other relevant documents submitted.

- The evaluation methods and the evaluation weight and the relationship between Expectations of Students and the evaluation methods

Entrance exam classification	Evaluation method	Evaluation weight	Matters related to ①	Matters related to ②	Matters related to ③
general examination	Essay	◎	✓	✓	
	Specialized subject	◎	✓	✓	
	English	◎			✓
	Application Documents	○	✓	✓	
general examination 【Public Health Course (Two-Year Course)】	Essay	◎	✓	✓	
	Specialized subject	◎	✓	✓	
	English	◎			✓
	Application Documents	○	✓	✓	
general examination 【Public Health Course (One-Year Course)】	Essay	◎	✓	✓	
	Specialized subject	◎	✓	✓	
	English	◎			✓
	Oral Examination	◎	✓	✓	
	Application Documents	○	✓	✓	

The mark ◎ indicates elements that are particularly important

The mark ○ indicates elements that are important

✓ is the Expectations of Students evaluated in the each evaluation methods

2. Expected Competencies, Diploma Policy

Based on the “Educational Goals” of the Graduate School of Medicine, in the Master's Program, we aim to nurture individuals who have basic knowledge and skills to play active roles in their own field as (i) researchers and

educators in the fields of medicine, life science and public health, (ii) highly specialized professionals in the fields related to medical care and public health, or (iii) experts in health services and health policy management. In order to develop such human resources, in Master's Program in Medicine, we grant the diploma under the following policies.

- (1) We grant Master of Medical Science to those who have attained the competencies to continuously contribute to the development of medical and life science research field by understanding the backgrounds of the medical and life science research, making plans for research theme of biologic importance or hypotheses to be validated, analyzing the obtained experimental or research results through verification of the validity and preparing another theme or hypotheses.
- (2) We grant Master of Public Health to those who have attained the competencies to continuously contribute to the development of public health field setting further measure against newly generated challenges through understanding the mechanism necessary for entire society and people's health, life and security and planning measures to maintain or improve health by collecting or analyzing the information necessary to solve the issues of public health or preventive medicine, as well as through putting those measures into execution effectively and evaluating the obtained results appropriately.

3. Course Introduction

In order to nurture individuals who attain "Expected Competencies", we offer interdisciplinary education beyond the boundaries of existing academic disciplines, aiming at the acquisition of basic knowledge and technology of mutually related fields. In addition, to nurture talented individuals responding to the diversified social needs, we introduce three types of coursework to study systematically through multiple subjects. Students choose the course that suits best to their purpose.

【Medical Science Course】

This course aims to train highly specialized professionals who are capable of playing active roles with broad knowledge of medical and life science fields.

【Public Health Course (Two-Year Course)】

This course aims to train human resources who are capable of playing active roles in addressing the challenges of public health with broad knowledge and high skills for the maintenance and improvement of the entire society and people's health, life and security.

【Public Health Course (One-Year Course)】

This course is intended for medical doctors, dentists, pharmacist and other professionals with a certain amount of practical experiences, and aims to train, in one year, highly specialized professionals who are capable of playing active roles in medical and public health fields.

Those who have chosen Public Health Course (either Two-Year Course or One-Year Course) should select one laboratory from Laboratories of Hygiene, Public Health, Forensic Medicine, Health Care Policy, Biostatistics, Medical Education and General Medicine, Regulatory Science, Translational Research Management and Patient Safety and Health Data Science.

※ Students should state their preference course when applying and after the admission students will be allocated to courses based on their preference. (Details will be informed after the admission.)

4. Course Guidance

The following 4 subjects are offered in the Master's Program in Medical Science.

- Required Core Subjects (Kyoutsu Koa Kamoku)
- Required Subjects I (Hisshu Kamoku I)
- Required Subjects II (Hisshu Kamoku II)
- Elective Subjects (Sentaku Kamoku)

"Required Core Subjects" are offered to cultivate the basic quality in the education at the Graduate School of Medicine, and are compulsory in all courses. "Required Core Subjects" include "Introduction to Basic Medical Research" to provide basic and systematic knowledge of medical research, "Basic Experimental Methods and Research Designs" to master designing of research, basics of epidemiology and biostatistics and so on. In line with "All-round Education", one of educational philosophies of Hokkaido University, students learn "Introduction to Medical Ethics" which cultivates bioethics for those engaged in medicine and "Introduction to Translational

Research” which promotes the understanding of bridging research aimed at establishing medical technology or pharmaceutical products in the clinical practice utilizing the results gained by basic research.

“Required Subjects I” are the subjects dedicated to the specialty of each course and offered according to the educational goal of each course.

“Required Subjects II” provides the courses aimed at developing skills of statistical analysis, presentation and so on. Furthermore, a supervisor in the laboratory is in charge of “Required Subjects II”, which grants credits to the practice and exercise related to master's thesis or the establishment of the research result of specific assignment.

“Elective Subjects” are offered to secure flexibility in selecting credits, and enable students to acquire a broad view and expertise beyond the course and a framework of specialized field.

Public Health Course provides 5 discipline areas of education (Epidemiology, Biostatistics, Social and Behavioral Sciences, Health Services Administration and Environmental Health Sciences) which are set as requirements by accreditation criteria of the Council on Education for Public Health in the United States. Students learn basic subjects at Required Subjects I, which aims at obtaining minimum knowledge and capability required of public health experts and will be conducted under the interdisciplinary educational system by educators specialized in medicine, science and engineering, and humanities and social sciences. “Elective Subjects” are offered to develop expertise regarding extensive and various public health issues, capability for gathering information and proper judgement.

How to take subjects	Take 4 credits from Required Core Subjects, 2 credits from Required Subjects I, 14 credits from Required Subjects II, and 10 credits or more including Basic Principles of Medicine offered by belonging laboratory from Elective Subjects.		Take 4 credits from Required Core Subjects, 7 credits from Required Subjects I, 14 credits from Required Subjects II and 5 credits or more from subjects with ※.		Take 4 credits from Required Core Subjects, 5 credits from Required Subjects I, 13 credits from Required Subjects II and 8 credits or more from subjects with ※.	

※ As for the subject which credit number is indicated as [number], students can take multiple choices as far as the chosen subjects belong to different subject titles.

Completion Requirements

Students are required to be enrolled in the Graduate School of Medicine for 2 years or more to complete Medical Science Course or Public Health Course (Two-Year Course), and for 1 year or more to complete Public Health Course (One-Year Course).

Students should acquire 30 credits or more in majored fields, and pass the qualifying review and examination of the Master's thesis after receiving required research instruction from the supervisor. In Public Health Course (One-Year Course), instead of examination of Master's thesis, examination of research achievements of specific assignment is allowed.

**Application Guidelines for
August Examination, 2023 and January Examination, 2024 for
Master's Program in Medical Science
(For enrollment April 2024)**

*Even though announced this way, there is a possibility that the graduate school must subsequently revise the examination procedure or postpone/cancel the examination(s) as a measure against COVID-19.

1. Number of Students Admitted

Medical Science: 20.

Before applying, please contact Student Affairs Office, Graduate School of Medicine at first, because the office needs to refer the prospective supervisor for the possibility to accept the applicant. Please be noted that only those who have been given prior approval from prospective supervisor can apply. For the information of laboratories, please check "Organization of the Graduate School of Medicine and main research contents".

2. Qualifications of Applicants (April 2024 Enrollment)

- (1) Those who have graduated or are expected to graduate from a university by 31 March 2024.
- (2) Those who were awarded or are expected to be awarded Bachelor's degrees from National Institution for Academic Degrees and Quality Enhancement of Higher Education (NIAD-QE) by 31 March 2024.
- (3) Those who have completed or are expected to complete 16 years of formal education overseas by 31 March 2024.
- (4) Those who have completed or are expected to complete 16 years of formal education provided by overseas educational institution by way of distance education while residing in Japan by 31 March 2024.
- (5) Those who have completed or are expected to complete an undergraduate course of a foreign university at an educational institution in Japan (limited to those who have completed 16 years of the said foreign country's curricular education) which is designated in the said foreign country's education system and specifically designated in Japan by the Minister of Education, Culture, Sports, Science and Technology by 31 March 2024.
- (6) Those who have been awarded or are expected to be awarded by 31 March 2024 a degree equivalent to Bachelor's degree from an overseas university or an overseas educational institution (limited to the one which overall situation such as educational and research activities has been evaluated by the said foreign country's government or the agency accredited by related organization or the one which is specifically designated as equivalent to above by the Minister of Education, Culture, Sports, Science and Technology) by completing three or more years of curriculum (including completing the said curriculum by an overseas educational institution by way of distance education while residing in Japan or completing the curriculum at an educational institution which falls into the specification of above (5)).
- (7) Those who have completed or are expected to complete by 31 March 2024 a specialized course of a special training school designated by the Minister of Education, Culture, Sports and Technology (only when the length of schooling is 4 years or more and other criteria stipulated by the Minister are met), on or after the date designated by the Minister of Education, Culture, Sports, Science and Technology.
- (8) Those designated by the Minister of Education, Culture, Sports, Science and Technology.
- (9) Those who have been or are expected to be fallen under one of the followings by 31 March 2024 and are deemed eligible to apply by the Graduate School of Medicine. (See Note.)
 - i) Those who have been enrolled for three years or more in a university.
 - ii) Those who have completed 15 years of formal education overseas.
 - iii) Those who have completed 15 years of formal education by overseas educational institution by way of distance education while residing in Japan.
 - iv) Those who have completed an undergraduate course of a foreign university at an educational institution

- in Japan (limited to those who have completed 15 years of the said foreign country's curricular education) which is designated in the said foreign country's education system and specifically designated in Japan by the Minister of Education, Culture, Sports, Science and Technology.
- (10) Those who are deemed by the Graduate School of Medicine based on individual qualification review to have academic ability equivalent to or greater than university graduates, and will be 22 years of age or older before 31 March 2024. (See Note.)

Note: Those who apply under Qualifications of Applicants (9) or (10), must undergo Qualification Review. Refer to 3. (4) Qualification Review for further information.

Qualification Review described in Qualifications of Applicants (10) is the process to examine research history and work experience of those who do not have university diploma, such as graduates of junior colleges, vocational high schools, special vocational schools and other schools.

3. Application Procedure

(1) Application Period

[August Examination, 2023]

Tuesday, 4 July 2023 to Friday, 7 July 2023

[January Examination, 2024]

Friday, 24 November 2023 to Tuesday, 28 November 2023

Office Hours: 09:00 to 17:00 (JST), excluding Saturday and Sunday *If the applicants send the application by post, send by express registered mail. Application documents must arrive within the application period.

Those who apply under 2. Qualifications of Applicants (9) or (10) must undergo Qualification Review.

Apply for Qualification Review within the application period enclosed with all necessary documents described in 3. (4) Qualification Review. Application deadlines for Qualification Reviews are Tuesday, 13 June 2023 for August Examination, 2023 and Tuesday, 31 October 2023 for January Examination, 2024.

(2) Application Documents and Examination Fee

Please request Student Affairs Office for the original booklet "Application Guidelines for August Examination, 2023 and January Examination, 2024 Master's Program in Medical Science", which includes Application Form and other necessary documents for application.

Application Form	Prescribed form included in the original booklet. Please request the original booklet from Student Affairs Office. Fill in your information and paste your photograph taken within the last 3months (full-face, 4 x 3cm, applicant's name printed on back) in the space provided.
Statement of Purpose	Prescribed Form. Included in the original booklet.
Academic Transcripts	Must be issued by a university/college president or Dean. If your family name has been changed afterward, please attach the document such as abstract of your family register, to prove that you have changed your family name.

Certificate of (Expected) Graduation or Completion	<p>Must be issued by a university/college president or Dean. (For graduates, be sure that the certificate includes information on your degree). If you apply under qualification (2), Certificate of Bachelor's Degree or expected Graduation or Completion. If your family name has been changed afterward, please attach the document such as abstract of your family register, to prove that you have changed your family name. *Those who graduated or will graduate from a university in China (excluding Taiwan, Hong Kong and Macau) must submit the following documents in addition to a Certificate of (Expected) Graduation (Completion) . Graduates: a. Online Verification Report of Higher Education Qualification Certificate (教育部学历证书电子注册备案表) b. A certified copy of Graduation Diploma (毕业证书) and Degree Diploma (学位证书) that has been authorized by a university/college Expected Graduates : a. Online Verification Report of Student Record (教育部学籍在线验证报告) Obtain documents "a" above by requesting it at "中国高等教育学历证书查询" : http://www.chsi.com.cn/xlcx/bgys.jsp. Also be sure that there are 15 or more days left until the expiration date of the online verification at the time of its submission.</p>
Examination Card/ Photo ID Card	<p>Fill in your information and paste photograph taken within the last 3 months (full-face, 4 x 3cm, applicant's name printed on back) in the space provided. Included in the original booklet.</p>
Self-addressed Envelope	<p>Self-addressed prescribed envelope with 344 yen stamp affixed to receive your Examination Card.</p>
Address Card	<p>Fill in your postal code, address, and mailing address clearly written in all three places. For receive the acceptance letter and documents for admission. Included in the original booklet.</p>
Examination Fee	<p>JPY30,000. Pay by the remittance form at Japan Post Bank or other banks in Japan, which is attached to the original booklet. Government-financed international students (persons receiving MEXT Scholarship grants) are exempted from this fee but must include a statement to this effect when submitting the application. 【ATM payment not】</p>
Form to Paste the Payment Certificate	<p>Prescribed form. Included in the original booklet. On this form paste the payment certificate of examination fee (certificate E) which is included in the original booklet and to be returned from the bank after payment</p>
(If applicable) Photocopy of Residence Card	<p>Applicants from abroad must submit photocopy of passport.</p>
(If applicable) Consent to Transfer and Process Personal Data	<p>Applicants from EEA must confirm the Handling of Personal Information on page 8 and submit the consent.</p>

(3) Applicants with Physical Disability

Physically disabled applicants who require special attention during tests and classes should contact Student Affairs Office of the Graduate School of Medicine by Tuesday, 13 June 2023[August

Examination, 2023] and Tuesday, 31 October 2023[January Examination, 2024].

(4) Qualification Review

Those who apply under 2. Qualifications of Applicants (9) or (10) must undergo individual Qualification Review. Apply within the application period enclosed with all necessary documents described as follows.

i) Application Period for Qualification Review

[August Examination, 2023]

Friday, 9 June 2023 to Tuesday, 13 June 2023

[January Examination, 2024]

Monday, 30 October 2023 to Tuesday, 31 October 2023

Office Hours: 09:00 to 17:00 (JST), excluding Saturday and Sunday *If the applicants cannot hand in to Students Affairs Office, send the application by express registered mail. Application documents must arrive within the application period.

ii) Application Documents for Qualification Review

In addition to the documents described in (2) above, submit the documents described below.

After receiving the results of Qualification Review, pay examination fee by the attached remittance form by payment due date. Paste the payment certificate of examination fee (certificate E) on the form included in the original form, and mail it to the address described in (5) below within (1) Application Period.

Application for Qualification Review	Prescribed form. Included in the original booklet.	
Self-addressed Envelope	Self-addressed envelope (23.5×12cm) with 344 yen stamp affixed, to receive the result of Qualification Review.	
Submission required depending on the qualification	Qualifications of Applicants	Documents to Submit
Letter of Recommendation	(9)	From Chancellor or Dean of the enrolled university
	(10)	From the head of research or business institutions, regarding research or business abilities
Certificates and Documents regarding Educational Background	(9)	Academic transcript from the enrolled university
	(10)	Certificate of graduation, transcript, documents stating qualification for enrollment, academic requirements for graduation, and study term. (Graduates of junior colleges, vocational high schools, special vocational schools and other schools.)
Other Certificates of Academic Ability Equivalent to that of University Graduates	(10)	Certificate of contents of research and work experience of two years or more (Graduates of two-year junior colleges.) Certificate of contents of research and work experience of one year or more (Graduates of three-year junior colleges.) Any materials to determine individual academic achievement, such as research papers

Other Materials may be requested if necessary.

iii) Procedure of Qualification Review

Qualification review is conducted by screening submitted documents.

iv) Announcement of Results

Results of Qualification Review will be notified to applicants by postal mail.

(5) Application Documents for both Entrance Examination and Qualification Review should be submitted to:

Student Affairs Office, Hokkaido University Graduate School of Medicine,
Kita 15 Nishi 7, Kita-Ku, Sapporo, Hokkaido, 060-8638 JAPAN Phone: +81-(0)11-706-5018

4. Public Health Course (One-Year Course)

Those who meet 2. Qualifications of Applicants and the following requirements (1) or (2) are qualified for Public Health Course (One-Year Course).

- (1) Those who have graduated from medicine or dentistry program at a university or a six-year program in pharmaceutical sciences, and have work experience of two years or more as physicians, dentists, or pharmacists.
(2) Those who are deemed by Hokkaido University Graduate School of Medicine under individual 3. (4) Qualification Review to have academic ability equivalent to or greater than the requirement 4. (1).

Those who apply for Public Health Course (One-Year Course) under the requirement 4. (1) must submit the following documents to Student Affairs Office (3. (5)) in addition to the documents described 3. (2) Application Documents and Examination Fee within 3. (1) Application Period.

Copy of the Physician's, Dentist's or Pharmacist's license	Black and white is acceptable. Reduced to A4 size (210x297mm). Registration number and name must be distinctively visible.
Certificate of Employment	Position and employment period must be clarified. (Free format)
Documents regarding the Motive to Apply for One-Year Course and Future Goals, Based on Past Work Experience.	Prescribed form

Those who apply for Public Health Course (One-Year Course) under the requirement 4. (2) must undergo individual 3. (4) Qualification Review. The applicants for August Examination, 2023 must submit the following documents to Student Affairs Office (3. (5)) in addition to the documents described 3. (2) Application Documents and Examination Fee by Tuesday, 13 June 2023. The applicants for January Examination, 2024 must submit the following documents to Student Affairs Office (3. (5)) in addition to the documents described 3. (2) Application Documents and Examination Fee by Tuesday, 31 October 2023.

After receiving the result of 3. (4) Qualification Review, pay examination fee using the attached remittance form by payment due date. Paste the payment certificate (Certificate E) on the form included in the original booklet, and mail to the address described in (5) below within 3. (1) Application Period. Application documents must arrive within 3. (1) Application Period.

Certificate of Employment	Position and employment period must be clarified. (Free format)
Documents regarding the Motive to Apply for One-Year Course and Future Goals, Based on Past Work Experience.	Prescribed form
Copy of the Public Health Nurse's or other license. (If any.)	Black and white. Reduced to A4 size (210x297mm). Registration number and name must be distinctively visible.

5. Selection of Entrants

Selection shall be determined based on the comprehensive evaluation of entrance examinations, academic transcripts, and other relevant documents submitted.

6. Date, Time, and Place of Entrance Examination

(1) Medical Science Course and Public Health Course (Two-Year Course)

Date	Time	Subject	Category	Place
[August Examination, 2023] Wednesday, 16 August 2023	08 : 40 - 08 : 50	Introduction		Information of place and examination card will be sent by post beforehand.
	08 : 50 - 09 : 50	Essay	Written	
	10 : 30 - 12 : 30	English	Written	
[January Examination, 2024] Tuesday, 16 January 2024	13 : 30 -	Specialized subject	Written or Oral	Will be informed at the day of the exam.

(2) Public Health Course (One-Year Course)

Date	Time	Subject	Category	Place
[August Examination, 2023] Wednesday, 16 August 2023	08 : 40 - 08 : 50	Introduction		Information of place and examination card will be sent by post beforehand.
	08 : 50 - 09 : 50	Essay	Written	
	10 : 30 - 12 : 30	English	Written	
[January Examination, 2024] Tuesday, 16 January 2024	13 : 30 -	Oral Examination	Oral	Will be informed at the day of the exam.
	14 : 00 -	Specialized subject	Written or Oral	Will be informed at the day of the exam.

7. Notice for Entrance Examination

- (1) Information regarding place and time of the examination will be notified by postal email with Examination card. Applicants must be at the designated place by the time.
- (2) Use of dictionaries (English-Japanese and English-English) is allowed in the English language exam. Use of any electric devices including electric dictionaries is prohibited. Foreign students can use one or more dictionaries of any language.

8. Announcement of Successful Applicants

[August Examination, 2023]

10:00AM Friday, 1 September 2023 (JST)

[January Examination, 2024]

10:00AM Friday, 2 February 2024 (JST)

Examinee numbers of successful applicants will be posted on the bulletin board at the main entrance lobby of the Graduate School of Medicine, as well as on the website of Hokkaido University Graduate School of Medicine around 10:00AM. A letter of acceptance will be mailed to each successful applicant. No telephone inquiries about the results of the examination will be accepted.

9. Admission Procedure

(1) Registration Period (excluding Saturday and Sunday)

Monday, 4 March 2024 to Friday, 8 March 2024

(2) Admission and Tuition fees

i) Admission Fee: JPY 282,000 (estimate)

Government-financed international students (persons receiving MEXT Scholarship grants) are exempted from this fee but must include a statement to this effect when submitting the application.

ii) Tuition Fee: : Half Year: JPY 267,900 (JPY 535,800/Year) (estimate)

*Tuition of the first half-year should be paid, using the payment form which will be sent from the

Graduate School of Medicine in the middle of the following month of the enrollment.

*If the fee is revised, the new one will be adapted accordingly.

- iii) Payments of admission and tuition fees could be exempted or postponed. Further information will be notified to successful applicants.

Payments of admission and tuition fees could be exempted or postponed. For further information, please contact Student Affairs Office.

10. Important Notice

- (1) Before filling in a column of the preferred laboratory on the application for admission, refer to “Organization of the Graduate School of Medicine and main research contents” and consult your future supervisor about research contents and plan.
- (2) Incomplete application documents will not be accepted nor considered.
- (3) Submitted documents cannot be revised.
- (4) Examination fee is non-refundable unless 1) the application was not made, 2) application documents were not accepted due to the documents being incomplete, or 3) double-payments were made. It takes considerable time for refund. “Payment Certificate E” or “Receipt of Remittance D” included in the original booklet and to be returned from the bank after payment is required to claim the refund to Student Affairs Office.
- (5) Admission may be cancelled if the application documents contain false information.
- (6) Application documents should be enclosed in the envelope bound-in this booklet and submitted either by express registered mail or in person to the office.
- (7) Any inquiry regarding admission and examination should be sent by post enclosing a self-addressed return envelope with a postage stamp affixed.
- (8) Eligibility to take the National Exam for Medical Practitioners is given to graduates of the School of Medicine, and is not given to those who have completed Master’s program, major in Medical Science of the Graduate School of Medicine.

11. Past Entrance Exam Questions

Past entrance exam questions of English for the last three years are available. Please request in writing to Student Affairs office enclosing a self-addressed return envelope (kaku-2 size, 24x33.2cm) with 250 yen stamp affixed.

12. Long-Term Study Program

Please read the following page for further information. Those who apply for Public Health Course (One-Year Course) are NOT eligible to apply for this program.

13. Use of Personal Information

- (1) All personal information collected by Hokkaido University will be completely protected in compliance with the Act on the Protection of Personal Information Held by Independent Administrative Agencies, and the EU General Data Protection Regulation (GDPR) pursuant to the Hokkaido University Regulations on Personal Information Management.
- (2) Your name, address, and other personal information you provide to the university through application and individual admissions screening processes will be used solely for ① enrollee selection (application processing and the screening process), ② the announcement of exam results, ③ admission procedures, ④ surveys and research on enrollee selection methods, and ⑤ other related processes.
- (3) The personal information in section (2) above will also be used after enrollment, only for those who pass the exam, for processes related to ① academic affairs (registration, academic guidance), ② student support services (health management, scholarship applications, dorm admission selection, welfare services, etc.), ③ job search support services, ④ tuition, ⑤ use of the university library, ⑥ use of information education facilities, ⑦ confirming your safety and communication in a disaster or emergency situation, and ⑧ public relations (distributing newsletters, information on events, etc.).
- (4) Personal information contained in exam results will be used to conduct surveys and research on enrollee selection methods.

- (5) For recruiting purposes, when we receive a request for information from the Hokkaido University Frontier Foundation (Kita 8 Nishi 5, Kita-ku, Sapporo, Hokkaido; Tel: +81-(0)11-706-2017) or Hokkaido University Athletic Union (Kita 17, Nishi 7, Kita-ku, Sapporo, Hokkaido; Tel: +81-(0)11-716-4815), the only personal information listed in section (2) will be provided for use within the scope of that organization's activities.
- (6) The personal information set forth in (2) will be retained for five years from the next academic year of our acquirement.
- (7) The university shall use Article 6, Paragraph 1 (a) of the EU GDPR as the basis for handling personal information and obtaining consent to use it. Personal information will only be used for the purpose for which consent has been given, except when required by laws and regulations.
- (8) The consent set forth in (7) may be revoked at any time. However, this does not affect the legal handling of personal information before consent was revoked.
- (9) Individuals who provide personal information may make the following requests to the university based on the EU GDPR and related laws and regulations:
 - ① Disclosure of personal information, ② Correction of personal information, ③ Erasure of personal information, ④ Limitation of the handling of personal information, ⑤ Objection to the handling of personal information, ⑥ Transfer of personal information to other service providers
- (10) If you have provided personal information within the European Economic Area, you may file an objection to a supervisory authority in accordance with Article 51, Paragraph 1 of the EU GDPR if you are dissatisfied with the university's handling of your personal information, etc.
- (11) Some of the processes in (2)–(5) mentioned above may be outsourced by the university to a contracted service provider (hereinafter referred to as “contractor”). All or some of the personal information provided by applicants may be provided to the contractor only as needed to perform the tasks for which it has been contracted.
- (12) This university is subject to Japan's Law for the Protection of Personal Information Retained by Independent Administrative Institutions, but not subject to adequacy decisions by the European Commission

Long-Term Study Program **(NOT eligible for Public Health Course (One-Year Course))**

1. Purpose

The standard term is two years. Long-Term Study Program (longer than two years) is offered for those who wish to study and acquire a degree through a long-term enrollment due to time limitations. Applicants are individually screened for eligibility.

2. Eligibility

Those who have difficulties in completing the program within the standard term due to personal reasons such as (1) full time jobs, (2) part time jobs (3) child-raising or a long-term nursing care, or (4) visual disabilities, auditory disabilities, physical disabilities or other disabilities are eligible to apply for this program.

3. Period of Enrollment

Students in Master's program may extend their term of study up to four years, and extension of study term can be applied by the year as a unit.

Students in Master's Program are allowed to stay enrolled up to two years in addition to the period approved for a Long-Term Study Program.

Students in a Long-Term Study Program are allowed to have two years leave as well as regular students.

4. Application Procedure

(1) Application Period

Please request at the time of application for admission. Application form is available at Student Affairs Office of the Graduate School of Medicine.

(2) Application Documents

Please submit the following documents to Student Affairs Office of the Graduate School of Medicine.

i) Application for the Long-Term Study Program (Form 1-1)

ii) Reasons to apply the Long-Term Study Program (Form 2)

iii) Study plan of the Long-Term Study Program (Form 3)

iv) Documents proving the need for the long-term study program

5. Shortening or re-extension of Long-Term Study Program

When deemed necessary by the Graduate School of Medicine, study term of Long-Term Study Program could be either shortened or re-extended once during the program.

Please contact Student Affairs Office of the Graduate School of Medicine for further information.

6. Tuition Fees

Annual tuition fee of the Long-Term Study Program is determined by dividing the total fees paid for the regular program of standard term (annual fee×2 years) by the number of years allowed for the Long-Term Study Program. Tuition fee is non-refundable, and the tuition already been paid will not be adjusted.

* Please do NOT pay tuition fee of the long-term study program before receiving a notice of determination.

※Organization of the Graduate School of Medicine and main research contents

	Department	Academic advisor		Research contents
Biochemistry	Molecular Biology	Professor	HATAKEYAMA Shigetsugu	1. Cell integrity based on cellular metabolisms and nuclear geometry 2. Nano structures controlling organelle dynamics 3. Molecular bases of cancer therapeutic resistance
	Medical Chemistry	Professor	HATAKEYAMA Shigetsugu	1. Ubiquitin system in protein degradation 2. Intracellular signal in cancer and immune system 3. Functional analysis of proteins/lipids by mass spectrometry
Anatomy	Anatomy and Embryology	Professor	WATANABE Masahiko	1. Visualization of expression and localization of neural signaling molecules 2. Glial roles in neural development and function 3. Molecular mechanisms for synaptic circuit development
	Histology and Cytology	Professor	FUJIYAMA Fumino	1. Anatomy and function of central nervous system 2. Elucidation of Parkinson's disease 3. Sensing mechanism in the mechanical and chemical sensory apparatuses
Physiology	Cell Physiology	Professor	OHBA Yusuke	1. Visualization of cell functions using fluorescence bioimaging 2. Spatiotemporal regulation of intra- and intercellular signal transduction 3. Regulation of membrane dynamics 4. Development and application of fluorescent biosensors
	Systems Neuroscience	Professor	TANAKA Masaki	1. Neural control of voluntary movements 2. Functional analysis of the frontal cortex 3. Functional analysis of the basal ganglia 4. Functional analysis of the cerebellum
Pharmacology	Neuropharmacology	Professor	YOSHIKAWA Takeo	1. Neuropharmacological studies of the histaminergic nervous system 2. Analysis of neuropeptides in wakefulness 3. Drug development targeting sleep disorders 4. Molecular biology of hyaluronic acid 5. Optical imaging of learning-induced neural circuit reorganization 6. Neural basis of autism spectrum disorder and social behavior 7. Cognitive mechanisms of virtual reality 8. Development of novel neural activity imaging techniques
	Cellular and Molecular Pharmacology	Professor Associate Professor	YOSHIKAWA Takeo NORIMOTO Hiroaki	1. Mechanism and function of REM and non-REM sleep 2. Cellular basis of memory 3. Alzheimer's disease 4. Molecular and cellular basis of hibernation
Pathology	Pathology	Professor	TANIGUCHI Koji	1. Research on inflammation and cancer 2. Research on inflammation and tissue regeneration 3. Mechanisms of autoimmune and inflammatory diseases 4. Research on tight junction 5. Development of new cancer-on-chip to elucidate the pathophysiology of intractable cancer 6. Human pathology and surgical pathology
	Cancer Pathology	Professor	TANAKA Shinya	1. Research on diagnostic and surgical pathology 2. Cancer progression, cancer stem cells, and therapeutics. 3. Profiling analysis of various diseases. 4. Bioimaging and rapid-immunohistochemistry. 5. Biomaterial for analysis of cellular reprogramming. 6. NGS-based research on brain tumor and sarcoma. 7. Student-oriented innovative research.
	Diagnostic Pathology	Professor Associate Professor	MATSUNO Yoshihiro TOMARU Utano	1. Diagnostic surgical pathology (including cytopathology) 2. Application of molecular studies in diagnostic pathology 3. Quality control and standardization in pathology laboratories 4. Clinicopathologic analysis of human malignancy
Microbiology and Immunology	Immunology	Professor	KOBAYASHI Koichi	1. Host protection mediated by TLR and NLR family proteins 2. Role of the innate immune system in the onset of infection and inflammatory diseases 3. Nod2-dependent intestinal mucosal homeostasis and pathogenesis of Crohn's disease 4. CITA/NLRC5: a key regulator of MHC class I genes 5. Mechanisms of immune evasion by cancers 6. Development of novel biomarkers and immunotherapies for cancer patients 7. Vaccine development against cancer and coronaviruses using a novel vaccine technology
	Microbiology and Infectious Diseases	Professor	FUKUHARA Takasuke	1. Studies on viral and host factors involved in the propagation of hepatitis virus (HBV, HCV) 2. Studies on the mechanism of pathogenicity of virus infection through molecular biological analysis and animal experimentation 3. Studies on the diagnosis and drug discovery of viral infection (Coronavirus, Flavivirus) 4. Epidemiological and molecular biological studies on zoonotic diseases (Hantavirus, Flavivirus)
Social Medicine	Hygiene	Professor	UEDA Kayo	1. Environmental epidemiological studies 2. Quasi-experimental assessment of population-level health interventions (interrupted time series, inc 3. Emergency preparedness for climate change, natural disasters, and infectious diseases in healthcare 4. Epidemiological study on behavioral and psychological symptoms of dementia 5. Assessment of health effects of climate change and global environment
	Public Health	Professor	TAMAKOSHI Akiko	1. Field study on diet and health 2. Studies on unhealthy status and its related factors of the elderly 3. Longitudinal study of age-related neuropsychiatric function among a community-based elderly 4. Studies on lifestyle factors and health in adults
	Forensic Medicine	Professor	MATOBA Kotaro	1. Studies on medico-legal diagnosis of cause of death, postmortem interval, wounds, asphyxia, identification and postmortem CT diagnosis. 2. Studies on the mechanisms of generation concerning exogenous unusual findings.
	Biostatistics	Professor Associate Professor	HATAKEYAMA Shigetsugu YOKOTA Isao	1. Multivariate survival analysis 2. Development and evaluation methodology for diagnostic method and clinical prediction model 3. Development and application of clinical trial design 4. Joint model of longitudinal data with flexibility 5. Clinical epidemiology using big-data and public database
	Medical Education and General Medicine	Professor	TAKAHASHI Makoto	1. Development of innovative teaching methods and materials 2. Development of innovative evaluation methods 3. Studies on factors that affect learning behavior 4. Studies on factors that affect physicians' career selection
	Regulatory Science	Professor	ARATO Teruyo	1. Studies on data necessary for the development of advanced biological medicines 2. Studies on developmental strategy for orphan drugs 3. Studies on post marketing surveillance of pharmaceuticals and medical devices

	Department	Academic advisor		Research contents
	Translational Research Management	Professor	SATO Norihiro	1. Methodology for clinical research 2. Data management of clinical trial 3. Management of cell processing for cell therapy and regenerative medicine 4. Methodology for translational research support
	Patient Safety	Professor	NASUHARA Yasuyuki	1. Research on the methodology about system approach to patient safety 2. Research on the methodology for cultivating talented risk managers in hospitals 3. Research on the methodology about standardization of medical accident investigation
	Health Data Science	Professor	ITO Yoichi	1. Studies on the methodology of clinical trials 2. Studies on the methodology of drug safety data analysis 3. Studies on the multivariate data analysis
	Clinical Genetics and Medical Ethics	Professor	YAMADA Takahiro	1. research on disclosure of secondary findings in genomic medicine 2. Research on newborn screening and genetic counseling 3. Research on tele-medicine in genetic counseling 4. Research on genetic counseling in presymptomatic genetic testing 5. Research on providing systems for prenatal genetic testing and genetic counseling
Internal Medicine	Respiratory Medicine	Professor	KONNO Satoshi	1. Prospective cohort studies of asthma and/or COPD 2. Research on molecular mechanisms, diagnosis, and treatment of thoracic malignancies 3. Research on molecular mechanisms of chronic airway disease and/or diffuse lung disease 4. Basic/clinical research on pulmonary hypertension and cardiac sarcoidosis 5. Basic / clinical research on respiratory infectious diseases
	Rheumatology, Endocrinology and Nephrology	Professor	ATSUMI Tatsuya	1. Basic and clinical research on autoimmune disorders 2. Research on the pathophysiology, diagnosis and therapy of diabetes, obesity and dyslipidemia 3. Research on the pathophysiology and therapy of endocrine diseases 4. Basic and clinical research on renal diseases
	Gastroenterology and Hepatology	Professor	SAKAMOTO Naoya	1. Research for pathophysiology, diagnosis and treatment of liver diseases 2. Research for pathophysiology, diagnosis and treatment of pancreatobiliary diseases 3. Research for pathophysiology, diagnosis and treatment of malignant tumor of digestive system 4. Research for pathophysiology and treatment of inflammatory bowel diseases 5. Research for pathophysiology, diagnosis and treatment of digestive diseases
	Cardiovascular Medicine	Professor	ANZAI Toshihisa	1. Research on pathophysiology, diagnosis, and treatment for ischemic heart disease 2. Molecular biological and clinical research on pathophysiology and treatment for heart failure 3. Research on etiology, diagnosis, and treatment for cardiomyopathy 4. Research on molecular and genetic basis, diagnosis, and treatment for lifestyle disorder 5. Research on etiology, diagnosis, and treatment for arrhythmia 6. Development of non-invasive technique for diagnosis of heart disease
	Medical Oncology	Professor	KONNO Satoshi	1. Research on diagnosis and treatment of malignant tumors 2. Research on molecular pathophysiology, diagnosis and treatment of lung cancers and 3. Research on molecular pathophysiology, diagnosis and treatment of tumors of the digestive 4. Research on cancer drug therapy 5. Research on molecular targeting therapy of cancer 6. Research on genome analysis, companion diagnostics and precision medicine of cancer
	Hematology	Professor	TESHIMA Takanori	1. Research on molecular pathogenesis, diagnosis, treatment of hematological malignancies 2. Basic and clinical research to improve outcome of hematopoietic stem cell transplantation and immune cell therapy 3. Basic research to understand cellular & molecular biology of hematopoiesis 4. Basic and clinical research on cell therapies against viral infections and malignant diseases 5. Pathogenesis, diagnosis, and treatment of immunodeficiencies, including AIDS 6. Research to improve safety and efficacy of blood transfusion 7. Research on platelet function, blood coagulation and fibrinolysis
	Health Care Medicine	Professor	ASAKURA Satoshi	1. Research for impaired health caused by stresses 2. Research for evidence based medicine in health examination 3. Research for occupational mental health 4. Research for adolescent mental health 5. Research for therapeutic interventions of mental disorders
	Clinical Cancer Genomics	Professor	KINOSHITA Ichiro	1. Research for cancer genomics 2. Research for genomic abnormality of cancer 3. Research for epigenetic alteration of cancer 4. Development of novel biomarker on cancer 5. Research for molecular targeted therapy on cancer
Radiology	Radiation Oncology	Professor	AOYAMA Hidefumi	1. Research for external irradiation 2. Research for high precision X ray therapy 3. Research for Particle therapy and Proton therapy 4. Research for medical physics 5. Research for radiobiology for radiotherapy
	Diagnostic Imaging	Professor	KUDO Kohsuke	1. Diagnostic radiology using CT, MRI, ultrasound, and nuclear medicine 2. Vascular imaging and interventional radiology 3. Radioisotope treatment 4. Imaging analysis of tracer kinetics and artificial intelligence 5. Synthesis of contrast media and radiopharmaceuticals 6. Molecular imaging using stable isotopes and radio isotopes

	Department	Academic advisor		Research contents
Surgery	Gastroenterological Surgery I	Professor	TAKETOMI Akinobu	1. Basic research and treatment on the surgical GI tract and HPB diseases. 2. Development of endoscopic and/or robotic surgery for the GI tract and HPB diseases. 3. Study for the pathogenesis and management of transplant immunology 4. Research for the improvement of organ preservation 5. Clarification of pathogenesis and development of new strategy of cell transplantation 6. Artificial Intelligence (AI) applied research in the field of gastroenterological surgery 7. Study of the surgical education and surgical training 8. Basic research and treatment on pediatric surgical oncology and pediatric hepato-biliary 9. Basic and clinical research on the function of pediatric digestive system
	Gastroenterological Surgery II	Professor Associate Professor	HIRANO Satoshi SHICHINOHE Toshiaki	1. Clarification of pathophysiology and development of surgical treatments of the malignancy of the digestive system 2. Development of endoscopic surgery and its devices 3. Clinical research for perioperative management of highly invasive digestive surgeries 4. Study for multidisciplinary treatment of pancreato-biliary cancer 5. Molecular research on biomarkers associated with oncological malignancy 6. Exploring translational research on immunotherapy 7. Analysis of immune responses in tumor microenvironments 8. Study of gene therapy for intractable cancers 9. Study for surgical education 10. Study for bariatric and metabolic surgery
	Renal and Genitourinary Surgery	Professor	SHINOHARA Nobuo	1. The mechanism of development of detrusor overactivity associated with lower urinary tract 2. Neural transmitted pathway at the bladder stimulation 3. The development of chronic rejection in transplanted kidney 4. The analysis of immunology in renal transplantation and development of the treatment of immunological regulation 5. The mechanism of carcinogenesis and progression in kidney cancer 6. The mechanism of metastasis and progression of urothelial cancer 7. QOL study on the treatment of prostate cancer 8. The development of minimal invasive surgery
	Cardiovascular Surgery	Professor	WAKASA Satoru	1. Research on surgery for severe heart failure 2. Research on surgery for functional mitral regurgitation 3. Research on myocardial protection 4. Research on cold preservation and autophagy in the heart 5. Metabolic disturbances in atrial fibrillation 6. Endovascular stent graft therapy for aortic diseases
	Breast Surgery	Professor	TAKAHASHI Masato	1. Research on biological characteristics in breast cancer 2. Research on endocrine therapy in breast cancer 3. Research on mechanisms of breast cancer development and prevention 4. Research on the development of new breast cancer screening methods 5. Research on the development of breast cancer surgical methods 6. Research on the perioperative drug therapy for breast cancer 7. Research on drug therapy for metastatic breast cancer 8. Research on hereditary breast cancer
	Thoracic Surgery	Professor	KATO Tatsuya	1. Development of minimally invasive thoracic surgery 2. Surgery in multimodality therapy for lung cancer 3. Lung transplantation 4. Photodynamic therapy using nanoparticle for thoracic malignant tumors 5. Development of early diagnosis and molecular targeted therapy using next generation sequence for lung cancer 6. Photoimmunotherapy for lung cancer 7. Therapy for malignant mesothelioma and dissemination of cancer
Anesthesiology and Critical Care Medicine	Anesthesia and Perioperative Medicine	Professor	MORIMOTO Yuji	1. Cerebral protection and resuscitation 2. Care and Cure for the whole body against invasive biological stress 3. Neurotoxicity by anesthetics 4. Mechanism of postoperative cognitive dysfunction 5. Mechanism and treatment of pain 6. Mechanism of respiratory cycle and effect of drugs 7. Hyperbaric oxygen therapy 8. Patient management system in the operating room and the medical economics
	Acute and Critical Care Medicine	Professor	MORIMOTO Yuji	1. Body responses to various insults –pathophysiology and their control- 2. Multiple organ dysfunction syndrome –pathophysiology and treatment- 3. Critical care medicine 4. Cardiopulmonary cerebral resuscitation 5. Toxicology 6. Disaster medicine 7. Medical, transportation, and information system for acute medicine 8. Traumatology
Reconstructive Surgery and Rehabilitation Medicine	Orthopedic Surgery	Professor	IWASAKI Norimasa	1. Elucidation of pathology and development of therapeutic strategy for arthritis 2. Identification of role of glycans in bone and cartilage metabolism 3. Study of pathology and development of therapeutic strategy for osteoporosis 4. Clarification of pathology and development of therapeutic strategy for intervertebral disc degeneration 5. Biomechanical study for pathology and treatment options of musculoskeletal diseases 6. Research about pathology and treatment strategy for spinal cord and peripheral nerve diseases 7. Development of novel analytic tools for musculoskeletal diseases using AI 8. Research about genetic and epidemiologic aspects of musculoskeletal diseases
	Plastic and Reconstructive Surgery	Professor	YAMAMOTO Yuhei	1. Translational research in wound healing 2. Translational research in treatment of keloid 3. Development of surgical technique in free tissue transfer 4. Basic research in surgical oncology 5. Translational research of angiogenesis of vascular and lymphatic vessel 6. Regenerative medicine based on tissue engineering method 7. Development of therapeutic technique in cranio-maxillo-facial surgery
	Rehabilitation Medicine	Professor	MUKAINO Masahiko	1. Research on motion analysis of movement disorders 2. Research on activity monitoring 3. Research on functioning statistics for daily life 4. Research on telerehabilitation 5. Research on assessment methods for cognitive impairment
	Sports Medicine	Professor	KONDO Eiji	1. Motion analysis of athletes for performance improvement 2. Development of reconstruction surgery for osteoarthritis 3. Tissue regeneration of joints 4. Elucidation of remodeling mechanism of soft tissue 5. Medical application of synthetic polymer gel 6. Development of advanced treatment technology for musculoskeletal disorder

	Department	Academic advisor		Research contents
Reproductive and Developmental Medicine	Pediatrics	Professor	MANABE Atsushi	1. Establishing methods for early diagnosis of primary immunodeficiency diseases. 2. Molecular epidemiological studies on macrolide-resistant mycoplasma pneumoniae 3. Clinical and molecular study for diagnosis and management in pediatric hematology and 4. Clinical and molecular study in pediatric stem cell transplantation and cell therapy. 5. Molecular analysis of pediatric endocrine disease. 6. Pathological analysis and therapeutic development using neurological disease model animals. 7. Histopathological analysis on the role of activated glomerular parietal epithelial cell in childhood kidney disease. 8. Development of a Mitochondrial Drug Delivery System for Myocardial Regeneration Therapy. 9. Study to improve outcome of neonatal chronic lung disease. 10. Basic and Clinical study in inborn errors of metabolism.
	Obstetrics and Gynecology	Professor	WATARI Hidemichi	1. Basic studies on the physiology of fetus and amnion 2. Clinical studies on the antenatal diagnosis and fetal therapy 3. Studies on the development of new strategy for the management of complicated pregnancies 4. Clinical studies on the treatment of infertility 5. Intrafollicular physiology 6. Molecular mechanism of genesis and metastasis of uterine cancer 7. Chemoresistance of female reproductive cancer 8. Molecular mechanism of placental growth and differentiation 9. Development of novel molecular-targeting therapy for ovarian cancer 10. Establishment of new effective screening method for cervical cancer
Sensory Organ Medicine	Dermatology	Professor	UJIIE Hideyuki	1. Molecular biological research of epidermis 2. Research on pathophysiology, diagnosis and treatment of genetic skin disorders 3. Research on pathophysiology, diagnosis and treatment of autoimmune blistering skin diseases 4. Research on pathophysiology, diagnosis and treatment of malignant skin tumors 5. Research on pathophysiology, diagnosis and treatment of atopic dermatitis 6. Research on tissue engineering and wound healing 7. Research on novel therapeutic modalities for genetic skin disorders
	Otolaryngology–Head and Neck Surgery	Professor Associate Professor	HOMMA Akihiro NAKAMARU Yuji	1. Basic research and clinical analysis for pathogenesis of sensorineural hearing loss 2. Basic research and clinical analysis of sensorineural hearing loss by viral infection 3. Basic research and clinical analysis of nasal allergy 4. Basic research and clinical analysis of Eosinophilic chronic rhinosinusitis 5. Immunological approach for head and neck cancer 6. Basic research and clinical analysis of chemotherapy for head and neck cancer 7. Molecular biologic studies on head and neck cancer
	Ophthalmology	Professor	ISHIDA Susumu	1. Retinal cell biology 2. Ocular Immunology and inflammation 3. Ocular neuroprotection 4. Ocular oncology and pathology 5. Pathophysiology and treatment of ocular surface disease 6. Ocular circulation and metabolism
Neurological Disorder	Psychiatry	Professor	KUSUMI Ichiro	1. Psychopathology of psychiatric diseases 2. Development of new psychotherapy techniques 3. Development of new diagnostic techniques and new treatment of epilepsy 4. Molecular genetic study of psychiatric diseases 5. Development of animal models of psychiatric diseases and neuroscience 6. Development of new psychotropic drugs and psychopharmacology 7. Neuroimaging in psychiatric diseases 8. Neurophysiological and neuropsychological study of psychiatric diseases
	Neurosurgery	Professor	FUJIMURA Miki	1. Basic and clinical research on malignant glioma 2. Basic and clinical research on cerebrovascular disorders 3. Basic and clinical research on spinal cord disorders 4. Translational research on CNS regeneration 5. Surgical anatomy of skull base surgery 6. Genomic research on cerebrovascular disorders 7. Cerebral hemodynamics and metabolism 8. Clinical research on pediatric neurosurgery

	Department	Academic advisor		Research contents
	Neurology	Professor	YABE Ichiro	1. Molecular biology and genetics for neurological disorders 2. Immunohistochemistry of muscles and peripheral nerves 3. Basic studies for the disease mechanism and therapeutic approach in neuro-immunological 4. Biomarkers in neurological disorders 5. Clinical neuroelectrophysiology 6. Cognitive brain function 7. Neuroepidemiology
Medical Biology	Neurobiology	Professor	KAMIYA Haruyuki	1. Neurobiology of axon 2. Neurobiology of synapse
Immunology	Immunobiology	Professor	SEINO Kenichiro	1. Tumor Immunology 2. Transplant Immunology 3. Development of a novel immune cell therapy using cell reprogramming technique
	Psychoimmunology	Professor	MURAKAMI Masaaki	1. Molecular mechanism for T cell-specific autoimmune disease development by the gateway 2. Bioelectronic medicine by the gateway reflexes and the VNS 3. Molecular mechanisms underlying inflammation development via the IL-6 amplifier activation 4. Research for functional roles of SNPs associated with chronic inflammatory diseases (the IL-6 5. Development of novel drugs and biomarkers for diseases associated with chronic inflammation (the IL-6 amplifier)
	Molecular Mechanisms	Professor	NODA Nobuo	1. Molecular mechanism of autophagy 2. Molecular mechanism of life phenomena regulated by liquid-liquid phase separation 3. Elucidating the molecular functions of biomolecules based on their structure
Pathological Oncology	Stem Cell Biology	Professor	KONDO Toru	1. Molecular mechanism involved in the maintenance and differentiation of neural stem/precursor 2. Molecular mechanism of neural stem/precursor aging 3. Characterization of cancer stem cells and analysis of their therapeutic targets 4. Relationship between neural stem cells and age-related disorders.
	Biomedical Oncology	Professor	SONOSHITA Masahiro	1. Studying how cancers develop 2. Elucidating the mechanisms of how drug resistance occurs in cancer 3. Generating novel anti-cancer therapeutics
